Further information on the survey area is available in Appendix 1.

### 3. Details of the Survey Vessel

The survey will be conducted by the '**Baltic Explorer**' (Callsign: LYBW). The vessel will display appropriate lights and signals. The survey will utilise multibeam echosounders, sub-bottom profilers, side-scan sonars, magnetometers, and ultra-high-resolution survey equipment. Geophysical equipment will be both hull-mounted and towed. Typically, the towed cable lengths will be about four times the water depth while acquiring survey data. The work will be conducted during 24 hr operations. Mariners are advised to keep continuous watch on VHF radio channel 16 when navigating the area.

All vessels operating within this area are requested to keep their distance and pass at minimum speed to reduce vessel wash.
